Secure Data Organizer Crack + Serial Key [Win/Mac]

I am a freelance writer, with a knack for computers. I want to help you achieve the freedom and flexibility of having all of your data managed and stored at your fingertips, securely. I had to go through the same pain of data storage at work that you are going through, because I wanted to eliminate the risk of losing it. I wrote Secure Data Organizer to help you solve your data storage issues, so you can have peace of mind. I created this app to help people who want to store their

sensitive data, by encrypting it, and assigning it to various websites, along with creating web browser autofill options.

- Securely store and organize and your usernames, passwords and other personal data.
- Create website associations so your personal data appears when a specified website is detected in your web browser.
- Drag and drop personal data (such as a login or password) to a web browser field, eliminating the need to type in or remember your information.
- Measure your password strength using the password strength meter.
- Generate strong passwords using the built-in password generator.
- Instantly search all of your encrypted data.
- Export your Secure Data Records to a mobile device or PDA so you can access them on-the-go.
- Export/Import your Secure Data Records so that you can access them at a separate location, for example, at the office.

If you like this app, don't forget to rate it and leave feedback in the comments section. Your support is very important to me. Screenshots: Download it for Free on AppStore!
